

JSJ DIESEL SALES

EDUCATION ENGINE SUPPLY PROGRAM

POWER THE NEXT GENERATION.

ONE ENGINE OR AN ENTIRE TRAINING LAB.

JSJ Diesel helps colleges, technical schools, trade schools and vocational programs source dependable diesel engines for hands-on instruction. From a single engine to multi-engine lab orders, we can help build the mix of makes, models and applications your students need to learn on real equipment.

BUILT FOR PROGRAM-SIZED ORDERS

Need 5, 8 or more engines? Need mixed brands for different training stations?
JSJ can help your school source, quote and ship the complete engine package.

1-866-563-3253 | jsjdiesel.com/colleges/

A diesel training program may need several engines at once.

That is exactly where JSJ Diesel can help. School purchases are different from a typical one-engine repair-shop order: instructors may need multiple engines, different brands, different electronic generations and different applications so students can train across the equipment they will actually see in the field.

MULTI-ENGINE ORDERS

Build a complete lab order instead of chasing engines one at a time.

MIXED-BRAND TRAINING

Combine makes and models so students get broader hands-on exposure.

CURRICULUM MATCHING Tell us what your program teaches and we can help match available engines to the need.

REPEAT SUPPLY

Need additional stations next semester? JSJ can remain a continuing source for the program.

Build training stations around the engines students will encounter.

Common brands JSJ supplies or sources for school programs include:

CATERPILLAR (CAT)

CUMMINS

DETROIT

INTERNATIONAL / NAVISTAR

MACK

VOLVO

PACCAR

ISUZU

MERCEDES

PROGRAMS WE CAN SUPPORT

- Diesel Technology / Diesel Mechanics
- Medium & Heavy Truck Technology
- Heavy Equipment / Construction Equipment
- Fleet Maintenance and Transportation Technology
- Engine Repair, Diagnostics and Engine Performance
- Automotive or vocational programs adding diesel instruction

Availability varies by make, model, year, configuration and current inventory.

1

TELL US THE PROGRAM NEED

Give us the brands, engine families, applications, quantity, budget range or curriculum objectives.

2

JSJ BUILDS THE ENGINE LIST

We match the request against current inventory and sourcing options, including multi-engine and mixed-brand orders.

3

RECEIVE A SCHOOL QUOTE

We provide pricing and availability in a format your department or purchasing office can review.

4

PLAN FREIGHT & DELIVERY

JSJ coordinates nationwide shipping and can help organize a multi-engine delivery to the campus.

5

KEEP JSJ AS A PROGRAM SOURCE

When the lab expands or another engine is needed, your school already has a diesel-engine supplier to call.

A diesel-engine company built to handle real inventory and real logistics.

1,000+ ENGINES

Large inventory and broad sourcing give schools more options when building a lab.

NATIONWIDE SHIPPING

JSJ ships diesel engines across the United States and can coordinate multi-engine freight.

RUN-TESTED DOCUMENTATION

When available/applicable, JSJ uses run-test video and condition checks to document engines before shipment.

DIESEL SPECIALISTS

JSJ works with diesel engines every day - not general surplus equipment.

ESTABLISHED SINCE 2011

A long-running diesel engine business with experience serving commercial buyers and institutions.

PURCHASING SUPPORT

We can work with instructors, program directors and purchasing departments through the quote process.

BUILD THE LAB YOUR STUDENTS NEED.

LET JSJ HELP SUPPLY THE ENGINES.

Send us your engine wish list, curriculum requirements or the quantity of training stations you are planning. Whether the request is one engine or a program-sized multi-engine order, our team will help build a practical quote.
